

F-11 Center Hung Sports Cube Structure

With its ultra lightweight design, the F-11 is perfectly suited for use in center-hung video- scoreboards used in many indoor sports arenas.

As part of the total solution, PIXLED offers a rugged but lightweight cube structure, custom-designed to house F-11 tiles and to meet the needs of this growing market. With its ultra low weight, the F-11 center-hung cube solution is one fifth the weight of similar sized models on the market today.

The cube structure has four sides with a 16:9 aspect ratio.

With its 5.500 NIT light output and superb color depth, the F-11 sports cube solution will not only provide rich vibrant, more exciting video content for fans, but more advertising opportunities for sponsors as well.
