

F-11 Touring Mechanics

With its ultra lightweight design, the PIXLED F-11 LED display is perfectly suited for use in the touring market. A set of rugged F-11 Touring Mechanics has been custom-designed for the F-11 to provide the total solution and meet the needs of this demanding industry.

Engineered with the input of seasoned touring rental companies, the F-11 Touring Mechanics ensure quick build-up and tear down, optimal truck loading for minimal transportation costs and easy access to the screen during the show.

Key benefits:

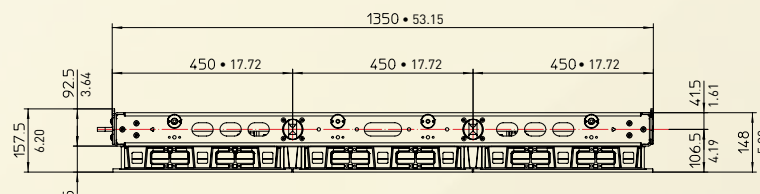

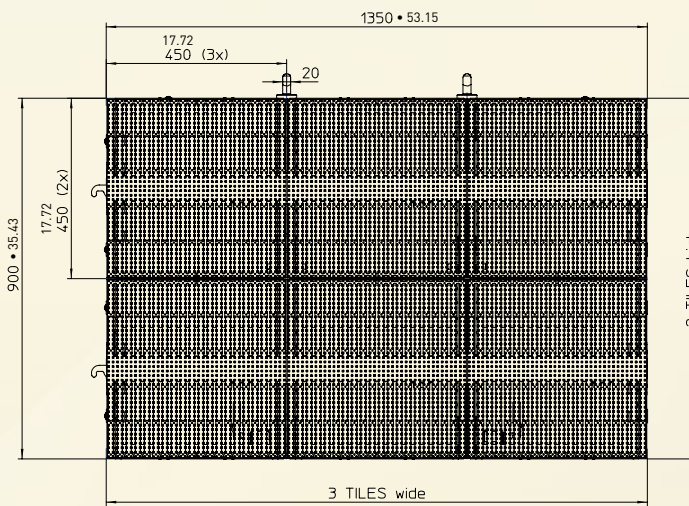

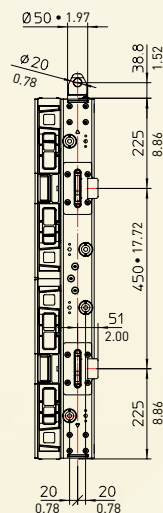

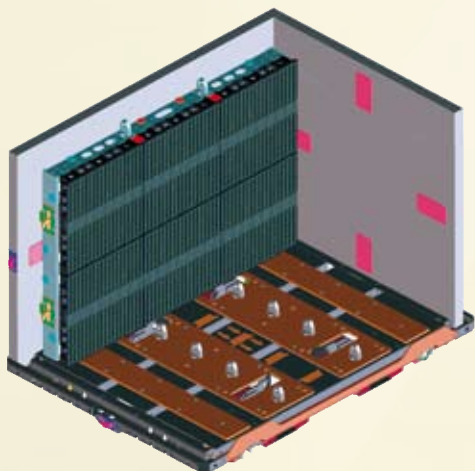

- Quick build-up and tear-down
- Rugged, easy to use locking systems
- Lightweight, quick-connect hanging brackets guarantee robust connection to truss systems
- Optimal loading for transportation
- Fold-away wheels on dollies enable stacking during transportation & storage
- Removable sides of dollies allow panels to be hoisted directly to and from their transportation housings
- Quick service access to LED screen via integrated climbing ladders
